REEF RITE KIWI SLIDES

KIWI SLIDES

“THE YACHTSMAN’S DREAM”

- ◆ **“KIWI SLIDES”** are used to replace Luff Tape on headsail luff and slugs on mainsail luff
- ◆ **“KIWI SLIDES”** are stronger than the sail.
- ◆ **“KIWI SLIDES”** are sewn to luff of sail (projecting 15mm) or can be tied on through eyelets
- ◆ 50% less friction with **“KIWI SLIDES”** when hoisting
- ◆ Easy single, and twin sail handling
- ◆ Captive luff
- ◆ Easy headsail change at any time
- ◆ Perfect for short-handed crew
- ◆ Fly headsails wing and wing with double groove foil extrusion
- ◆ Sail conversion easier and cheaper than Luff Tape
- ◆ Easy to replace at sea. Torn luff tapes means full length replacement
- ◆ Can be used in conjunction with **“REEF RITE”** furler
- ◆ More than 3500 sails fitted with **“KIWI SLIDES”**

KIWI SLIDES ARE AVAILABLE IN THE FOLLOWING SIZES

| Model | Foil groove | Breaking Strain (lb) |
|-------|-------------|----------------------|
| 6/40 | 6mm | 506 |
| 7/50 | 7mm | 616 |
| 8/60 | 8mm | 880 |
| 9/70 | 9mm | 1210 |
| 11/11 | 11mm | 1430 |
| 12/12 | 12mm | 1430 |

Note: The above Breaking Strain tests were carried out on Reef Rite foil extrusions. During the tests, the extrusion began to spread before any sign of Kiwi Slide failure. Other foil extrusions may not reach these figures
